I have been working in metals, stones and clay for about two years now and taking classes on a regular basis to hone my skills and learn new techniques.

Copper is one of my favorite metals to work with. It is a beautiful metal that is reasonably priced and allows for a wide range of design options. Chain Maille designs in copper or silver really lend themselves to original creations, especially when you add semiprecious stones and all the color options using enameled copper rings.

I have been working with polymer clay for several years and thoroughly enjoy creating pieces in this medium. Pendant pieces and small articles for personal use or the home are such fun to create. Imagination and a few tools are all you need.

I am always happy to help you design your own jewelry or clay items. If you see something you like but would like to make changes in metals, stones, or change a piece from necklace to bracelet, etc., adjust the length, just let me know.

I take orders for most items that have already sold so if you see something that has been already sold, but would like a similar design, you can order it custom made.

Thank you for your interest.
